Allison

Once we get the results, we will send the letter and the results.

I would like to invite you and Clyde to the site so you can see what I am dealing with.

Thanks

Gary

Subject: Proposed Discharge of Stormwater from CES Site

Dear Gary,

Attached are the local limits and the additional categorical limits that the CES facility was subject to when they were discharging.

I understand Clyde spoke with your colleague at Westin Solutions and we are expecting a written request for the discharge. Please include the analytical results with that request.

Best,

Allison Osborne
